

Katello - Feature #6278

[RFE] katello-installer pre-installation requirements check

06/18/2014 07:45 PM - Bryan Kearney

Status:	Closed	Fixed in Releases: Found in Releases: Red Hat JIRA:
Priority:	Normal	
Assignee:	Bryan Kearney	
Category:	Installer	
Target version:	Katello 2.0	
Difficulty:	easy	
Triaged:	Yes	
Bugzilla link:	1003992	
Pull request:		
Description		
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1110521 [RFE]		
The katello-installer command should provide validation of system requirements (free disk space, memory, etc) prior to installing Satellite. This would allow the end user to ensure that the system has the proper configuration prior to installation and prevent a bad user experience due to a (preventable) failed install.		
Additionally, the command should provide a switch to disable this requirement checking for an advanced user to use.		
Version-Release number of selected component (if applicable): katello-installer-0.0.45-1.el6sat.noarch		

Associated revisions

Revision 98d60257 - 07/15/2014 01:26 PM - Bryan Kearney

Fixes #6278 : Add additional checks to the installer.

This adds two new checks. One is using the output of java --version to ensure the version is at least 1.7 and is the OpenJDK. The second is looking for total available disk space of at least 5 GB. This does not really ensure a space issue, but it is a good first cut.

Revision 41dc0ccb - 07/16/2014 09:53 AM - Bryan Kearney

Merge pull request #73 from bkearney/bkearney/6278

Fixes #6278 : Add additional checks to the installer.
