Pull request:				

Description

When entering a smart variable for a puppet class with a really long value in a matcher i get the following crash

ActiveRecord::StatementInvalid
PGError: ERROR: value too long for type character varying(255) : INSERT INTO "audits" ("action", "associated_id", "associated_name", "associated_type", "auditable_id", "auditable_name", "auditable_type", "audited_changes", "comment", "created_at", "remote_address", "user_id", "user_type", "username", "version") VALUES ($1, $2, $3, $4, $5, $6, $7, $8, $9, $10, $11, $12, $13, $14, $15) RETURNING "id"
app/controllers/puppetclasses_controller.rb:32:in `update'
app/models/concerns/foreman/thread_session.rb:33:in `clear_thread'
lib/middleware/catch_json_parse_errors.rb:9:in `call'

the value attempting to be saved is over 400 characters long

sample value that causes the issue

["10.50.14.6^{7600}","10.50.14.7^{7600}","10.50.14.8^{7600}","10.50.14.9^{7600}","10.50.14.10^{7600}","10.50.14.11^{7600}","10.50.14.12^{7600}","10.50.14.14^{7600}","10.50.14.14^{7600}","10.50.14.15^{7600}","10.50.14.16^{7600}","10.50.14.17^{7600}","10.50.14.16^{7600}","10.50.14.17^{7600}","10.50.14.20^{7600}","10.50.14.21^{7600}","10.50.14.22^{7600}","10.50.14.23^{7600}","10.50.14.28^{7600}","10.50.14.29^{7600}","10.50.14.40^{7600}","10.50.14.41^{7600}","10.50.14.42^{7600}","10.50.14.43^{7600}"]

the smart variable is an array

the match key is a hostgroup of the form gppbase/int1/gppxxxxxxxx

I placed it against the audit log because of the table it was updating
