<b>Pull request:</b> <a href="https://github.com/Katello/katello/pull/4564">https://github.com/Katello/katello/pull/4564</a>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1105085">https://bugzilla.redhat.com/show_bug.cgi?id=1105085</a> Model class app/models/katello/ping.rb executes /etc/init.d/katello-jobs. This is security concern.  I am allowing this in our SELinux policy for now, because katello-jobs service will be removed for GA and it will be replaced by dynflow engine. All other services are checked with their API, I expect the same for dynflow so no services are needed to be executed at all.  Please remove this exec for GA once dynflow engine replace katello-jobs. Once this task is done, please raise a BZ on SELinux component to remove the rules.  PM: Please waive this for GA not Beta.

### Associated revisions

#### Revision b58a527e - 08/19/2014 06:28 AM - Ivan Necas

Fixes #6283 - Use the Dynflow API to find out if the foreman\_tasks is running

Instead of spawning process to find out the katello jobs was running
