Description	
Currently the development deployment does not support a few things with regard to provisioning: access to /pulp/repos via httpd access to unattended url via http. Adding the following to /etc/httpd/conf.d/15-default.conf seems to resolve this: <pre>ProxyPass /pulp ! ProxyPass /pub ! ProxyPass / http://localhost:3000/ ProxyPassReverse / http://localhost:3000 ProxyPreserveHost on</pre> Include /etc/pulp/vhosts80/*.conf

The 2nd part of the issue related to accessing the /unattended foreman route via http, so we need to also forward traffic on port 80 to the rails server on 3000. By doing this we also need to grant access to /pulp and /pub normally, hence:

```
ProxyPass /pulp !  
ProxyPass /pub !  
ProxyPass / http://localhost:3000/  
ProxyPassReverse / http://localhost:3000  
ProxyPreserveHost on
```
