Foreman - Bug #630

Clicking on "build" deletes all historic data without confirmation (or successful operation)

Description

By clicking on "Build" (accidentally or not) all the host historic data will be gone without any confirmation.
(Btw, the "Build" failed with an error "Failed to enable <machinename> for installation".)

I believe it should not delete the data if it fails.

Would be also nice to have a confirmation: "Are you sure ?" <Yes/No>

fixes #630 - Clicking on build deletes all historic data without confirmation

History

#1 - 03/09/2011 07:15 AM - Ohad Levy

adding the confirmation is fairly easy, but I cant understand why it failed without additional info... (logs etc).

thanks

#2 - 03/09/2011 03:46 PM - Marcello de Sousa

The fact that it fail was no issue (as I didn't configure anything related to unattended install yet). So it was an expected failure. The lack of a confirmation is the only problem here I think.

Cheers,
Marcello
