Katello - Bug #6300

Text should not be accepted as a limit for activation keys and host collections

06/19/2014 07:58 PM - Christine Fouant

Status:	Closed

Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1097054
Description of problem:
I was trying to update the system limit of selected activation key and trying to validate that limit with some special characters and strings. But when I entered a string and clicked on save, a spinner starts rotating with a text 'working'

And when I navigate away, the limit was set to same as it was originally.

Version-Release number of selected component (if applicable):
Satellite 6 Beta Snap 4

Satellite-6.0.3-RHEL-6-20140508.1

How reproducible:
always

Steps to Reproduce:
1. create a activation key with system limit to 1
2. update the system limit with some string
3.

Actual results:
updating the system limit with some string gives a spinner rotating with a text 'working'

Expected results:
user should get proper validation error.

Refs #6300 - use activationKey.unlimited rather than -1.

Revision 607f4e7f - 07/08/2014 01:23 PM - Walden Raines

Fixes #6078, #6300, #6514, BZ1105175, BZ1097054, BZ1101586: fix limit fields

This commit changes the way we handle limited fields such as Content Host
number of systems and Activation Key usage limit. Instead of representing
"unlimited" as -1 we now represent it as a boolean on the object.
