

Katello - Feature #6321

Bastion pages should enforce permissions when entering the page

06/20/2014 06:26 PM - Walden Raines

Status: Closed	
Priority: Normal	
Assignee: Walden Raines	
Category: Web UI	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1111695	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/4382	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1111695	
Description of problem:	
In other words you can copy/paste a URL and visit a Bastion page directly even if you don't have permissions to visit that page.	
Version-Release number of selected component (if applicable):	
Latest.	
How reproducible:	
Always.	
Steps to Reproduce:	
<ol style="list-style-type: none">1. Create a role2. Add a single filter to the role3. Create a user4. Add the role from step 1 to the user5. Logout6. Login as the user from step 37. Visit another bastion page not governed by the permission created in step 28. Note you can access the page (but nothing is displayed as the REST calls result in 403s).	
Actual results:	
You can access the page (but nothing is displayed as the REST calls result in 403s).	
Expected results:	
A message that tells the user they don't have permission to view this page

Revision 461630b5 - 07/17/2014 07:22 AM - Walden Raines

Fixes #6321/BZ1111695: check permission before displaying bastion page.

Ensure the current user has the correct permission prior to displaying the Bastion page. Before this commit the page would display with 403s for any requests the user did not have access to.
