Pull request:	
Description	
When multiple errors exist on a resource, particularly when deleting (try deleting a subnet that is used by multiple hosts and host groups, since #6216), you get error messages appear such as:	
<pre>libvirt (192.168.122.0/24) is used by imagetest2.example.com
libvirt (192.168.122.0/24) is used by hammer2.example.com
libvirt (192.168.122.0/24) is used by hammer1.example.com
libvirt (192.168.122.0/24) is used by api5.example.com
libvirt (192.168.122.0 /24) is used by wstest.example.com
libvirt (192.168.122.0/24) is used by cclient2.exempl e.com
libvirt (192.168.122.0/24) is used by libvirt
libvirt (192.168.122.0/24) is used by example.com</pre>	
Due to the recent CVE fix in #5881 .
