

Katello - Bug #6415

trying to add multiple repos containing .treeinfo to a CV causes publish to fail.

06/27/2014 01:36 PM - Justin Sherrill

Status: Closed	
Priority: Normal	
Assignee: Justin Sherrill	
Category: Web UI	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1113282	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1113282	
Description of problem: When trying to add multiple repos to a CV, where > 1 of these repos contains a .treeinfo, user can no longer publish the CV.	
Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140624.2	
How reproducible:	
Steps to Reproduce:	
<ol style="list-style-type: none">1. Create a product "sat6 capsule" with repos "sat6-capsule" and "sat6-common", pointing to appropriate repos that contain .treeinfo2. Enable RHEL 6Server3. Sync all three repos above4. Create a CV, "capsuleCV"5. Add all three repos above to CV6. Attempt to publish	
Actual results:	
Content Views cannot contain multiple Kickstart trees with the same version and architecture. Multiple Kickstart trees of 6.0.3 x86_64 were found in Repositories: sat6-capsule, sat6-common	
CV cannot be published	
Expected results:	
CV can handle multiple repos which contain .treeinfo that are not necessarily kickstart trees.	
CV can be published
