Description	
Filtering using "or" on different subfacts returns odd results. Filter: facts.is_virtual = true or facts.area = office Returns 0 records. Filter: facts.is_virtual = true Returns 646 records. Filter facts.area= office Returns 3 records.	
Filtering using the less than and greater than on numeric looking data (like facts.uptime_days) also returns unexpected results. Filter: facts.uptime_days > 400 Returns 41,42,449...	
Filter: facts.uptime_days <100 Returns 0,1,10 Filter: facts.uptime_days =13 Returns 24 records.
