Pull request:	https://github.com/Katello/hammer-cli-katello/pull/200	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1092712

Description of problem:

Using the CLI to create a new content host does not provide the user with information as to what are the required fields. Example:

```
hammer> content-host create --name example01.usersys.redhat.com --organization-id ACME_Corporation
Could not create content host:
undefined method `default_environment' for nil:NilClass
```

It would be great if hammer could tell me exactly which field is required here.
