

Katello - Bug #6457

If you upload content to a repository repeatedly within 5 minutes, only 1 item gets created

07/01/2014 10:22 AM - Partha Aji

| Bugzilla link: 1115089 | Red Hat JIRA: |
| Pull request: | |
| Description | |
| Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1115089 | |
| Description of problem: | |
| If you upload 2+ puppet modules within 5 minutes and then do a content search, it'll only show 1 of the total number uploaded. The problem is that ElasticSearch is only pulling in a single item of the last 5 minutes. A workaround is to reindex. The content is stored properly in Pulp, it's just not indexed. | |
| Version-Release number of selected component (if applicable): | |
| How reproducible: | |
| Always | |
| Steps to Reproduce: | |
| <ol style="list-style-type: none">1. Create a puppet repo2. Upload 2+ puppet modules3. Click on the number of puppet modules on the same page to go to the content search. | |
| Actual results: | |
| You only see 1 puppet module. | |
| Expected results: | |
| You should see 2+ puppet modules. | |
| Additional info: | |

Revision b59110cb - 07/01/2014 10:37 AM - David Davis

Fixes #6457,BZ1115089 - Match multiple items on contents changed

The problem when uploading multiple items is that we were doing a unit search that could have multiple results but we were only looking at the first one. We need to get the ids of all.
