<b>Description</b>		
kickstarted builds on an ovirt compute resource don't finish, can not cancel build manually.		
Either option produces this error (this one from a manual cancel attempt) so the build is never marked completed, even after a successful build:

I believe this is the same as [#4375](#), check one of the last comments for a small code change to workaround the problem.

Whups, I'd seen that and thought it was different for some reason, but I believe you're correct and it's the same issue.

I can confirm that the workaround for [#4375](#) resolved my problem here. Thanks!
