

Foreman - Feature #6468

Authorization filter owner = current_user

07/02/2014 08:49 AM - Martin Matuška

Status: Closed	
Priority: Normal	
Assignee: Tomer Brisker	
Category: Users, Roles and Permissions	
Target version: 1.7.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/1713	
Description The new rights system in Foreman 1.5 is missing an ability to match the host owner with the current user logged in. A possible syntax could be: owner = current_user and/or owner_id = current_user_id This way an abstract role for a user able to manage just his own hosts is possible (or his own hosts in addition to other hosts)

Maybe scoped search ext_method could be used for this.

I'm willing to test this when some code is prepared, this is real blocker after our switch to Foreman 1.5

#4 - 07/31/2014 05:00 AM - Martin Ducar

Can we change this to bug as this is regression from 1.4 version, unless you are willing to have 1:1 mapping role to user
