

Katello - Bug #6469

Content view promotion: text refers to org id (?) rather than org name

07/02/2014 08:57 AM - Brad Buckingham

Status:	Closed	
Priority:	Normal	
Assignee:	Brad Buckingham	
Category:	Web UI	
Target version:	Katello 2.0	
Difficulty:	trivial	Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:	1113740	Red Hat JIRA:
Pull request:		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1113740

Description of problem:

When promoting a CV to a new environment, text reads what appears to be the org id, not the org name.

Version-Release number of selected component (if applicable):

Satellite-6.0.3-RHEL-6-20140626.0 but seen far earlier.

How reproducible:

Steps to Reproduce:

1. Create a set of environments
2. Sync content
3. Create a content view
4. Add content to content view and publish
5. Attempt to promote to new environment

Actual results:

text which reads:

Choose one or more lifecycle environments from the existing promotion paths available in '1'.

Expected results:

Probably something like

Choose one or more lifecycle environments from the existing promotion paths available in 'ACME_Corporation'.

Revision 565a5785 - 07/02/2014 09:13 AM - Brad Buckingham

fixes #6469 / BZ 1113740 - content view promotion - remove org id from user message

When promoting a content view version, a message like the following was displayed to the user:

Choose one or more lifecycle environments from the existing promotion paths available in '1'.

The '1' was intended to represent the organization. In the past, this was the org label; however, CurrentOrganization has since been updated to use org id, resulting in this behavior.

Rather than add another request to the server to obtain the org name and since we generally don't use that type of terminology elsewhere in the UI, this commit is making the message generic.

(Note:the user can still see what org they are in via the org switcher located on every page)
