Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1113230
Description of problem:
I was trying to verify bz 1111145, and found that we when immediately click on 'Add' button after clicking package group filter name.
Page went into Loading state. And firebug raises 404 not found. Also a long trace back raised in production.log

Version-Release number of selected component (if applicable):
sat6 beta snap10 compose3

How reproducible:
always

Steps to Reproduce:
1. create a repo rhel65_x64
2. create CV add repo to it
3. create filter of type package-group
4. on creation, click on 'Add' (without loading the page completely)

Actual results:

NetworkError: 404 Not Found -
https://10.65.207.190/katello/api/v2/content_view_filters//available_package_groups?page=1&search="

Expected results:
I think 'Add' button should only be enabled when the page is fully loaded to prevent this issue.

Revision b08843b4 - 07/07/2014 08:50 AM - Brad Buckingham

fixes #6472 / BZ 1113230 - content view filter - fix issue where filter not available

On the content view filter edit screens, it was possible for a
"really fast" user to click links that utilized the filter, before
it had actually been loaded. Eg. Open a filter and click the 'Add' tab.

This small change will ensure that we do not render the content of the
filter edit, before the filter is actually available.
