Smart Proxy - Bug #6474

rubygems not loaded before gems themselves

Description

[#6436](#) has broken the EL6 package installation, which can no longer start the foreman-proxy service:

```
[root@foreman-el6 ~]# service foreman-proxy start
Starting foreman-proxy: /usr/share/foreman-proxy/lib/smart_proxy.rb:5:in `require': no such file to load -- sinatra (LoadError)
    from /usr/share/foreman-proxy/lib/smart_proxy.rb:5
    from /usr/share/foreman-proxy/bin/smart-proxy:5:in `require'
    from /usr/share/foreman-proxy/bin/smart-proxy:5
                                            [FAILED]
```

It appears that bundler_helper was responsible for requiring rubygems, but is now used after the attempt to require sinatra. It probably needs splitting into an initialisation part (to require rubygems, bundler_ext) and another to do the original job of require_groups.
