<b>Bugzilla link:</b>		<b>Red Hat JIRA:</b>
<b>Pull request:</b>		
<b>Description</b>		
<p>For Katello, the Permissions model ends up doubling the list of models, one with single quotes, one without. This ends up showing in the filter list twice -- with the humanized name, and without.</p> <p>e.g.:</p> <pre>1.9.3-p448 :015 &gt; Permission.uniq.order(:resource_type).pluck(:resource_type).compact   SQL (2.1ms) SELECT DISTINCT "permissions"."resource_type" FROM "permissions" ORDER BY resource_ type =&gt; ["Architecture", "Audit", "AuthSourceLdap", "Bookmark", "CommonParameter", "ComputeProfile", " ComputeResource", "ConfigTemplate", "Domain", "Environment", "FactValue", "Filter", "Host", "HostC lass", "Hostgroup", "Image", "'Katello::ActivationKey'", "Katello::ActivationKey", "'Katello::Cont entView'", "Katello::ContentView", "'Katello::GpgKey'", "Katello::GpgKey", "'Katello::HostCollecti on'", "Katello::HostCollection", "'Katello::KTEEnvironment'", "Katello::KTEEnvironment", "'Katello:: Product'", "Katello::Product", "'Katello::SyncPlan'", "Katello::SyncPlan", "'Katello::System'", "K atello::System", "Location", "LookupKey", "Medium", "Model", "Operatingsystem", "Organization", "' Organization'", "Parameter", "Ptable", "Puppetclass", "Realm", "Report", "Role", "SmartProxy", "'S martProxy'", "Subnet", "Trend", "User", "Usergroup"]</pre> <p>Katello is only sending one set of permissions so I'm not sure how this is getting doubled.</p>

PR <https://github.com/theforeman/foreman/pull/1557>

Maybe there's a better fix to solve the deeper problem.

Not a bug in Foreman, it's on Katello side.
