

Katello - Bug #6488

roles: auto search should be enabled for all katello related resource types.

07/03/2014 01:04 PM - Stephen Benjamin

Status: Closed	
Priority: Normal	
Assignee: Stephen Benjamin	
Category: Web UI	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1112112	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/4385	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1112112	
Description of problem: I was trying to add permissions under a selected role. When I choose 'medium' resource type and unchecked the 'Unlimited' checkbox to search n select specific resource then auto search was active (see screenshot)	
However when I tried to select "LifeCycle Environment" then auto search was not enabled.	
I tried other resource types like Domain and environment and auto search was enabled for these as well. However I didn't see this for any of katello related resource type.	
Version-Release number of selected component (if applicable): sat6 beta snap10 compose2	
How reproducible: always	
Steps to Reproduce: 1. create a role 2. Add permissions to role 3. select "LifeCycle environment, activation keys	
Actual results: auto search not enabled for katello related resource types. However it is enabled for foreman resources like domain, environment, medium etc.	
Expected results: behaviour should be same for both foreman and katello resources. So expecting same auto search for katello related resources.
