

Katello - Bug #6494

roles API shall access foreman roles (not katello roles)

07/04/2014 06:33 AM - Tomáš Strachota

Status: Closed	
Priority: Normal	
Assignee: Tomáš Strachota	
Category: API	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1102816	Red Hat JIRA:
Pull request:	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1102816 Description of problem: It looks I'm accessing other roles when using roles API than the roles displayed in Sat6 WebUI. Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140523.0-Satellite-x86_64 How reproducible: always Steps to Reproduce: 1. \$ curl -s -H "Content-Type:application/json" -H "Accept:application/json,version=2" -k -u admin:changeme -d '{"role":{"name":"new_role"}}' -X POST http://localhost/katello/api/roles { "created_at": "2014-05-29T15:29:37Z", "updated_at": "2014-05-29T15:29:37Z", "id": 6, "name": "new_role", "locked": false, "description": null } Actual results: But I do not see 'new_role' on https://&lt;sat6_fqdn&gt;/roles Role with id = 6 is: 'View hosts' Expected results: roles API access the same roles as displayed on WebUI
