Pull request:	
Description While doing the safemode rendering it looks like we overlooked snippets. Should be pretty simple to do.	

Associated revisions

Revision b1d0f88f - 02/16/2011 03:02 AM - Justin Sherrill

Fixes #650 - Makes snippet rendering use the safemode module to prevent attacks

Note, that the safemode module is still not used for file system snippets, since those require file-system access anyways
