<b>Pull request:</b>		
<b>Description</b>		
<ol style="list-style-type: none"><li>1. Create a product + a repo.</li><li>2. Associate them in a CV, publish</li><li>3. Remove the product via bulk actions. You should see an error saying. Cannot delete products since its already associated to the library.</li><li>4. Go to the products page..</li></ol> <p>Actual: The product is missing even though the dynflow code complained that the product didnt get deleted due to an error.</p> <p>Expected: Expect to see the product there since it didnt get deleted.</p> <p>PS: The product actually doesnt get deleted from the DB. Its just that its prematurely deleted from elastic search.</p>		

#### Associated revisions

##### Revision 49e0a51d - 07/09/2014 11:17 AM - Partha Aji

Fixes #6513/bz1116933- Fixed search issues with product destroy

Product destroy dynflow code would prematurely remove the product from the elastic search before removing from the db. So product record would be wiped off the search index even if product delete failed due to some validation issue. This commit fixes that.

##### Revision dab5f271 - 07/09/2014 11:40 AM - Partha Aji

Merge pull request #4395 from parthaa/prod-destroy-fix

Fixes #6513/bz1116933- Fixed search issues with product destroy
