Description		
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1107604		
Description of problem:		
I was trying to install package on selected content-host. But found that the "Perform" button was active/enabled even no package name was specified in text box.		
Also, If I click on "Perform" button without specifying package name, nothing happens on UI, but production.log filled up with a long execution:		
Processing by Katello::Api::V2::SystemPackagesController#install as JSON

How reproducible:		
always		
Steps to Reproduce:		
1. go to content-host --> select registered system --> Packages --> select package actions --> Perform		
2.		
3.		
Actual results:		
Also, If I click on "Perform" button without specifying package name, nothing happens on UI, but production.log filled up with a long execution:		
Expected results:		
Perform button needs to be disabled, when no package/group name is defined
