-----	
Using version 1.6.0-0.develop.201407110944gitbbafbc0.el7 on EL7 I found that /etc/foreman-proxy/settings.d was not symlinked into /usr/share/foreman-proxy/config which resulted in no configuration changes being seen.	

## History

### #1 - 07/14/2014 07:39 AM - Lukas Zapletal

- Project changed from Foreman to Packaging
- Category changed from Packaging to RPMs

### #2 - 07/14/2014 11:18 AM - Anonymous

- Status changed from New to Need more information

The install isn't supposed to create a symlink to settings.d, instead main config file is updated with :settings\_directory pointing to 'settings.d' in '/etc':  
<https://github.com/theforeman/foreman-packaging/blob/rpm/develop/foreman-proxy/foreman-proxy.spec#L79>.

### #3 - 10/20/2014 06:57 AM - Dominic Cleal

- Status changed from Need more information to Rejected
