

Katello - Bug #6607

Package Filter rules should not restrict on unique package name.

07/14/2014 05:20 PM - Brad Buckingham

Status: Closed	
Priority: Normal	
Assignee: Brad Buckingham	
Category: Web UI	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1106565	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/4426	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1106565	
Description of problem:	
Having repository with wit packages	
<pre>package-0:1.0.0 package-0:2.0.0 package-0:3.0.0 package-0:4.0.0</pre>	
There isn't an easy way to setup a filter such that the following packages are included:	
<pre>package-0:2.0.0 package-0:4.0.0</pre>	
Simply because:	
<pre>validates :name, :presence => true, :uniqueness => { :scope => :content_view_filter_id }</pre>	
You can't have two rules with the same package name. We should either lift this restriction or support a comma seperated list of values for exact versions.

Revision 092b6b9a - 07/15/2014 10:17 AM - Brad Buckingham

fixes #6607 / BZ 1106565 - Content View Package Filter Rules - allow duplicate name

Prior to this commit, a user could not create multiple package filter rules for the same package (i.e. name) but different specific versions.

For example, if a repo had the following packages:

```
package-0:1.0.0
package-0:2.0.0
package-0:3.0.0
package-0:4.0.0
```

A user could not create rules to include/exclude the following packages:

```
package-0:2.0.0
package-0:4.0.0
```
