Pull request: https://github.com/foreman/foreman/pull/1586	
Description	
<p>When creating a cloud-init user data script, one may want to use the write-files directive to write out Foreman snippets, which would need to be indented. I'd like to add a helper called indent so I can do something like this:</p>	
<pre>#cloud-config some_directive: true foo: bar write_files: - path: /root/freeipa.sh permissions: '0755' content: <% indent 4 do snippet "freeipa-register" end %></pre>
