How reproducible:

Always

Steps to Reproduce:

1. Create a life cycle environment - EV1, Label - EV1
2. Update name of the life cycle environment to EV2
3. Attempt to create a life cycle environment - EV1 again (Do not change the label)

Actual results:

EV1 gets created. Refresh the page. Notice-

1. EV1 is created with label EV1
2. label of EV2 is automatically changed to EV1 to EV2.

Expected results:

I thought labels are unchanged after they are created. If this is true, we should not allow this automatic update of labels by the system.

Additional info:

Associated revisions

Revision d1996db3 - 07/15/2014 11:16 AM - Brad Buckingham

fixes #6619 / BZ 1111733 - Lifecycle Environment: do not update label

The lifecycle environment label was being 'auto updated' when a user would change the environment name. This should not be done as the label is intended to be read-only.

Revision ce2c4f29 - 07/16/2014 08:03 AM - Brad Buckingham

Merge pull request #4427 from bbuckingham/issue-6619

fixes #6619 / BZ 1111733 - Lifecycle Environment: do not update label
