Revision 80a2f885 - 07/31/2014 10:36 AM - Eric Helms

Fixes #6620: Allow plugins to define a file to be included in test_helper.

For some plugins additions to the test_helper are needed to allow
the test suite to pass. This checks if a file test/support/foreman_support
exists and requires it after all the Foreman test setup is done.

History

#1 - 07/15/2014 01:26 PM - The Foreman Bot

- Status changed from New to Ready For Testing

- Target version set to 1.8.0

#2 - 07/30/2014 06:50 AM - Anonymous

- Target version changed from 1.8.0 to 1.7.5

#3 - 07/30/2014 01:37 PM - Eric Helms

In some cases, a plugin may modifies or changes core Foreman behaviors such that for the Foreman tests to run in the context of the plugin some setup code may need to be run before the test suites. In Katello currently, if the Foreman unit tests are run there are a number of errors thrown about "running a dynflow action in a transaction" which can be squelched by including the following in the test helper via this functionality:

Organization.class_eval do
def ensure_not_in_transaction!
end

```
def execute_planned_action
  end
end
```

User.class_eval do
def ensure_not_in_transaction!
end

```
def execute_planned_action
  end
end
```
