#### Description

Seems like on Jenkins we're getting

```
NameError: uninitialized constant Fog::Compute::AWS
```

But locally it's passing. The difference in Gemfile.lock files seems to indicate Jenkins is not requiring all the fog gems for some reason:

```
$ diff
```

```

I don't know why it's not picking up fog-json and fog-brightbox, so I'll enable explicitly for now

Refs #6641 - Revert "Explicitly add fog-json and fog-brightbox for jenkins"

This reverts commit f16e76bfa3fd08404a17c45bef2b0b7cbadefe56. Looks like the issues with Jenkins were due to a Bundler API issue, see <http://bundler.io/blog/2014/07/16/bundler-api-outages.html> for details.
