Description of problem:	
Creating a compute resource name with 245 chars fails with the below error.	
PGError: ERROR: value too long for type character varying(255) : INSERT INTO "compute_resources" ("attrs", "created_at", "description", "name", "password", "type", "updated_at", "url", "user", "uuid") VALUES (\$1, \$2, \$3, \$4, \$5, \$6, \$7, \$8, \$9, \$10) RETURNING "id"	
I believe the actual limit is 255 chars and anything from 256 chars should fail.
