Pull request:		
Description It seems that most CRUD operations don't support returning proper json if "Accept: application/json" is added to the request headers. The following controllers don't seem to support json for Create/Update/delete and some don't support it for index: architecture config_templates domains environments hostgroups hosts hypervisors media operatingsystems ptables smart_proxies subnets		
Related issues: Related to Foreman - Bug #472: Destroying domains redirects to main domain
