- ruby193-rubygem-net-ldap-0.3.1-3.el6sat.noarch
- ruby193-rubygem-runcible-1.0.8-1.el6sat.noarch

How reproducible:

Always

Steps to Reproduce:

1. Navigate to Satellite and create an Activation Key
2. Click on the newly selected Activation Key

Actual results:

No helptip displayed with the command to register content hosts

Expected results:

It will be very useful to the user if we display the helptip (shown below) like what Katello used to show before:

"Activation Key enables you to modify the selected activation key. This key may be used during system registration. For example, subscription-manager register --org ACME_Corporation --activationkey activationkey1"
