

Katello - Bug #6709

[RFE] Updating the system limit below to already consumed should throw a validation error

07/21/2014 05:30 PM - Christine Fouant

Status: Closed	
Priority: Normal	
Assignee: Christine Fouant	
Category: Web UI	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1098425	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/4466	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1098425	
Description of problem: I've created a activation-key with system limit to unlimited. And I've registered two systems with same activation-key.	
Later, when I tried to reduce the limit to '1' which is less than the already consumed hosts, it was correctly updated and notification says: Activation Key updated.	
But when I navigate away and come back on same page then found the system limit was still set to what it was originally i.e. unlimited in this case.	
So ideally, UI should throw a validation error if I set the limit below to already consumed host.	
Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140508.1

How reproducible:
always

Steps to Reproduce:

1. create a activation-key with unlimited system limit
2. register two content-host with it
3. update the system limit of created key to "1"

Actual results:

Key was updated and ssystem limit set to '1' but when you navigates away from that page and come back the limit was set to what it was originally.

Expected results:

UI should raise validation error.
