| <b>Assignee:</b> Justin Sherrill   |                           |
| <b>Category:</b> Web UI  |                           |
| <b>Target version:</b> Katello 2.0   |                           |
| <b>Difficulty:</b> medium  | <b>Fixed in Releases:</b> |
| <b>Triaged:</b> Yes  | <b>Found in Releases:</b> |
| <b>Bugzilla link:</b> 1085162  | <b>Red Hat JIRA:</b>      |
| <b>Pull request:</b> <a href="https://github.com/Katello/katello/pull/4471">https://github.com/Katello/katello/pull/4471</a>   |                           |
| <b>Description</b>   |                           |
| Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1085162">https://bugzilla.redhat.com/show_bug.cgi?id=1085162</a>  |                           |
| Description of problem:<br>After syncing RHEL6 RPM 6Server successfully, I added the kickstart repo. When going back to the sync status page, I noticed that RHEL shows 0 bytes and "queued", and the content dashboard showed that RHEL was not synced. |                           |
| Creating a content view and looking at the list of products shows "NA" for both sync status and last sync.   |                           |
| It just appears that there's some weirdness in the UI, but I'm not sure that anything really wrong is going on on the back-end.  |                           |
| Version-Release number of selected component (if applicable):<br>katello 1.5.0-19.el6sat (snap 6 compose 2)  |                           |
| Expected results:<br>On the sync status page we should show that all the packages are synced, or something.  |                           |
