Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/smart-proxy/pull/185	
Description	
Clean up the params input to the DHCP::Server.addRecord method	
Actual: Add a DHCP record to local DHCP config files. POST the same record information to the DHCP new record endpoint Smart Proxy returns an HTTP 409 claiming that the new record conflicts with the existing record.	
Expected: Smart Proxy ignores the new record because it is a match for the existing config file record.

Revision dd9d295b - 08/06/2014 09:10 AM - Aaron Stone

Fixes #6745 - Clean up the params input to the DHCP::Server.addRecord method

This fixes the ability to match and ignore pre-existing identical DHCP records.
