Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1108928
Description of problem:
I can not scroll page Content -> Sync Status when I have slightly more repos that fit to one page height and I'm using Firefox.

Version-Release number of selected component (if applicable):
Satellite-6.0.3-RHEL-6-20140611.1

How reproducible:
always

Steps to Reproduce:
1. Create more slightly repos that fit to your Content -> Sync Status page
in fully expanded state
2. Try to use mouse wheel or right hand scroll stuff to scroll to
the bottom of the page

Actual results:
I'm unable to fully scroll down.

Expected results:
I can scroll.

Additional info:
Looks like this have something to do with hiding top-nost bar with "Red Hat Satellite" label. I have not seen this issue when I have made browser window smaller. Seems to me you can simulate this with almost any non-0 count of repositories and making browser window just little less height than needed to display the list without scroll bar.

Revision b2b52bc3 - 07/23/2014 07:06 PM - Walden Raines

Fixes #6759/BZ1108928: using #content as topbar.js expects.

Foreman's topbar.js expects an element with an id of "content"
that it adds top padding the size of the header to in order for
there to be sufficient room for the floating header. This commit
renames #maincontent to #content so Foreman's topbar.js works for
katello pages.
