Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1121532
Description of problem:
I was trying to create a template and didn't pass any name, then UI throws following error adjacent to 'name' text box

"can't be blank and can't be blank"

Version-Release number of selected component (if applicable):
sat6 GA snap1

How reproducible:
always

Steps to Reproduce:
1. create a template without passing name
2.
3.

Actual results:
UI throws same error two times

Expected results:
one time "can't be blank is sufficient
