

Foreman - Bug #6771

UI should raise a success notification on adding/updating resources via two-pane

07/24/2014 11:01 AM - Dominic Cleal

Status: Resolved	
Priority: Normal	
Assignee:	
Category: Web Interface	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1121012	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1121012	
Description of problem: when we add/update OS parameters, then on submation the form gets closed and we don't know whether parameter is added or updated unless we navigate back to 'Parameters' tab.	
So UI should raise a success notification saying "Successfully Updated os <name>"	
Version-Release number of selected component (if applicable): sat6 GA snap1	
How reproducible: always	
Steps to Reproduce: 1. create an OS 2. Add/update OS parameter 3.	
Actual results: No success notification, no way to know whether parameter was added/updated unless we navigate back to 'parameters' tab	
Expected results: UI should raise a success notification when we update anything under OS	
Additional info:	

History

#1 - 07/24/2014 11:02 AM - Dominic Cleal

- Subject changed from UI should raise a success notification on adding/updating OS parameters to UI should raise a success notification on adding/updating resources via two-pane

- Category set to Web Interface

This seems to happen for all two-pane forms, no updated/created notifications/flashes are shown to the user.

#2 - 01/18/2015 07:36 AM - Tom Caspy

- File Screen Shot 2015-01-18 at 2.34.08 PM.png added

just tested this for addition/update of parameters and it seems to work.

thing is, the notification disappears quite quickly, as seen in the screenshot - I've barely had enough time to capture it, caught it in middle of fading out.

#3 - 01/19/2015 04:17 AM - Dominic Cleal

- Status changed from New to Resolved

Yep, it does indeed seem to work now.
