Description

Example output:

our Gemfile lists the gem gettext (> 2.0) more than once.

You should probably keep only one of them.

While it's not a problem now, it could cause errors if you change the version of just one of them later.

Your Gemfile lists the gem locale (<= 2.0.9) more than once.

You should probably keep only one of them.

Your Gemfile lists the gem gettext_i18n_rails_js (>= 0.0.8) more than once.

You should probably keep only one of them.
