Foreman - Bug #6782

user's location and organisation are wiped out when making irrelevant changes to the user account

07/25/2014 08:31 AM - Neil Miao

Status:	Resolved		
Priority:	Normal		
Assignee:			
Category:	Web Interface		
Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.5.1
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

How to reproduce:

1. user bob own a host that belongs to Location A and Organisation B
2. edit bob, verify that the location A and Org B are pre-selected and greys out
3. edit something, say 'surname' and save
4. bob disappeared from location A and organisation B, and he shows up in the mismatch report

it seems the when the user's location and org multi-selectbox is disabled, the pre-selected values didn't made their way into some hidden field.

feasible patch:

```

Please submit patches via GitHub pull requests, we don't take them from issue reports. Thanks.

#2 - 07/28/2014 05:18 AM - Neil Miao

I said "feasible patch" cos I am not sure if there is any better way to do it. that's all

#3 - 07/28/2014 05:20 AM - Neil Miao

besides, it seems the code in develop branch eliminate the bug already. just giving u guys a heads up.

#4 - 07/28/2014 11:23 AM - Dominic Cleal

- Status changed from New to Resolved

Good to hear, closing as resolved in 1.6.0. Thanks!
