Triaged:	Found in Releases:
Bugzilla link: 1121526	Red Hat JIRA:
Pull request:	
Description	
Upload a binary file into provisioning templates and production.log is filled with the binary data. It should be filtered out instead.

PR closed.

#3 - 09/01/2016 09:35 AM - Adam Price

- Status changed from New to Resolved

This doesn't appear to be a problem anymore. I can populate the template editor with a binary file, but I can't upload it. Also there is no binary data in production.log.
