History

#1 - 07/29/2014 08:19 AM - Joseph Magen

- Subject changed from Ajax bugs on new host form if . Select boxes are not updating if location / changed are changed. to On New Host form, changing location/organization should update all dropdown boxes whether they are already selected or not

- Status changed from New to Assigned

- Assignee set to Joseph Magen

On New Host form, location / organization are usually selected first and the drop-down boxes are updated according. However, if a dropdown box, such as domain, is selected, and then the location / organization is changed, currently the domain drop remains populated with the same value even if it's not in the new location/organization. Likewise, subnet dropdown box should be populated, but it's not.
