

Foreman - Bug #6838

Overwrite option loses override param value

07/30/2014 08:21 AM - Jon Skarpeteig

Status: New	
Priority: Normal	
Assignee:	
Category: Host creation	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Overriding a puppet module parameter for a host, clicking save:	
When faced with a DHCP ip conflict, the override for the parameter is lost. Even after filling out the override again (before clicking the red overwrite button), the change isn't saved.	
Attempting to override a hash value.
