Category:		
Target version:		
Triaged:		Found in Releases: 1.5.2
Fixed in Releases:		

Description

After update the foreman from 1.4 to 1.5, the application don't work. It broke when loading page with the following message: (see attached file)

"Web application could not be started

Validation failed: Search Invalid search query: Field 'compute_resource_id' not recognized for searching!
....."

History

#1 - 12/21/2015 11:53 AM - Eric Helms

- Project changed from Katello to Foreman
- Category deleted (81)

#2 - 12/21/2015 11:55 AM - Dominic Cleal

- Status changed from New to Feedback

This appears to be an unmigrated database. Please try migrating with foreman-rake db:migrate or re-test a newer version and reopen the ticket if it's still an issue.

#3 - 05/17/2017 11:15 AM - Anonymous

- Status changed from Feedback to Resolved
