

Foreman - Bug #6844

Going to /api/v2 shows API v1 routes rather than v2

07/30/2014 12:13 PM - Dominic Cleal

Triaged:		Found in Releases:
Bugzilla link:	1105773	Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/1644	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1105773

If I go to /api/v2 in a foreman install, I do not see all the endpoints for katello in there. What I see listed is:

```
"links": {
  "List all authsource ldaps": "/api/auth_source_ldaps",
  "List all media": "/api/media",
  "List of subnets": "/api/subnets",
  "List roles": "/api/roles",
  "List all hosts": "/api/hosts",
  "List all users": "/api/users",
  "List all ptables": "/api/ptables",
  "List all lookup_keys": "/api/lookup_keys",
  "List all architectures": "/api/architectures",
  "List templates": "/api/config_templates",
  "List all compute resources": "/api/compute_resources",
  "List all settings": "/api/settings",
  "List all audits": "/api/audits",
  "List all fact values": "/api/fact_values",
  "List all smart_proxies": "/api/smart_proxies",
  "List all models": "/api/models",
  "List all puppetclasses": "/api/puppetclasses",
  "Show available links": "/api",
  "List all operating systems": "/api/operatingsystems",
  "List all common parameters": "/api/common_parameters",
  "Get Dashboard results": "/api/dashboard",
  "List all usergroups": "/api/usergroups",
  "List all reports": "/api/reports",
  "List of domains": "/api/domains",
  "Get statistics": "/api/statistics",
  "List all bookmarks": "/api/bookmarks",
  "List all images for compute resource": "/api/compute_resources/:compute_resource_id/image
s",
  "List all autosign": "/api/smart_proxies/smart_proxy_id/autosign",
  "List all template kinds": "/api/template_kinds",
  "List all environments": "/api/environments",
  "List all hostgroups": "/api/hostgroups",
  "List custom info": "/katello/api/custom_info/:informable_type/:informable_id",
  "List distributors in environment": "/katello/api/environments/:environment_id/distributor
s",
  "List permissions for a role": "/katello/api/roles/:role_id/permissions",
  "Shows status of system and it's subcomponents": "/katello/api/about",
  "List LDAP groups associated with the role": "/katello/api/roles/:role_id/ldap_groups",
  "Get list of errata associated with the host collection": "/katello/api/organizations/:org
anization_id/host_collections/:host_collection_id/errata",
  "Show status": "/api/status"
```

Associated revisions

Revision 06bbfc35 - 08/05/2014 07:54 AM - dustin tsang

Fixes #6844 - display v2 resources rather than v1 resources in /api/v2

History

#1 - 07/30/2014 12:14 PM - Dominic Cleal

- Subject changed from *Going to /api/v2 should show me all apis for plugins and main foreman server* to *Going to /api/v2 shows API v1 routes rather than v2*

- Category set to *API*

As Walden observed in the bugzilla:

It looks like the routing for /api/v2 is incorrectly routing to /api/v1 (or at least pointing to v1 api pie docs instead of v2):

```
[walden@[redacted] katello (6828)]$ diff -dbu <(curl -s http://admin:changeme@[redacted]/api/v1) <(curl -s http://admin:changeme@[redacted]/api/v2)
[walden@[redacted] katello (6828)]$
```
