<b>Description</b>	
Take the example of the following issue <a href="http://projects.theforeman.org/issues/6807">http://projects.theforeman.org/issues/6807</a>	
1. create a host collection	
2. add two new hosts to host-collection	
3. Go to the host collections index page.	
Notice that the content hosts count has not been updated	
Similar bugs occur on	
<ul style="list-style-type: none"><li>• Product/Repositories page (where we add a repo to the product and the index still shows the previous number)</li><li>• Content Views, where the repo/env names are not similarly update</li><li>• Gpg Keys with the product/repo count</li></ul> and so on. This is probably true for every nutupane page.	
We need a generic mechanism/service to automatically update the Index list when we change specific details of one of the items
