<b>Pull request:</b> <a href="https://github.com/Katello/katello/pull/4515">https://github.com/Katello/katello/pull/4515</a>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1038323">https://bugzilla.redhat.com/show_bug.cgi?id=1038323</a>	
We depend on the installation of the katello-agent RPM on the client systems to detect applicable errata and management of the remote systems.	
We should have some indication in the user interface (CLI too) that a system is missing the katello-agent package and explain the consequences.	
Other vendors offer similar functionality when managed systems lack required tooling.
