Can you try running foreman-rake db:migrate followed by a foreman-rake db:seed?

#2 - 07/31/2014 04:12 PM - Douglas Brancaglione

I had not run the rake db: seed, after that everything was ok!

But I still have another problem: The foreman recognizes the class created in the / etc / puppet / environments / production / modules / likewise

But I edit the node for foreman and likewise include the class, but when I run the puppet client it gives this error message:

```
Error: Could not retrieve catalog from remote server: Error 400 on SERVER: Could not find class is likewise client.mydomain.domain on node
client.mydomain.domain
```

```
Warning: Not using cache on failed catalog
```

```
Error: Could not retrieve catalog; skipping run
```

Ohad, runs like a charm now! please disregard the last message (module topology)!

Tks

Glad it's working!
