Bugzilla link:	1075523	**Red Hat JIRA:**	
Pull request:	https://github.com/Katello/katello/pull/4550		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1075523
Description of problem:
Hidden user called "hidden-P9dcO7" on my case is not hidden in webUI, have incorrect email and can be deleted

I have been explained by inecas it is there because:

<inecas> jhutar: this user is used when some operation needs to happen without user particular user logged in: usually data seeding to external services
<inecas> jhutar: pulp in particular

Version-Release number of selected component (if applicable):
Satellite-6.0.3-RHEL-6-20140305.1

How reproducible:
always

Steps to Reproduce:
1. Check https://<fqdn>/users

Actual results:
User called "hidden-P9dcO7" on my case is not hidden in webUI, have incorrect email and can be deleted

Expected results:
User should be hidden (for API as well I guess), and you should not be able to delete it. It's mail should translate to something meaningful

Associated revisions

Revision fabaaedd - 08/08/2014 09:59 AM - Walden Raines

Fixes #6870/BZ1075523: use ANONYMOUS_ADMIN for hidden user.

Foreman recently added the concept of an ANONYMOUS_ADMIN to User.
This commit makes use of that in order to ensure that this user
is not displayed on the users page.
