

Foreman - Refactor #6878

Replace default_scope with specific scopes for visibility

Pull request:	
Description default_scopes have caused a few bugs, mostly around sorting as the field used for sorting may not be available when the model is used in another query. When used to restrict visibility (e.g. #3272 for hidden users and taxonomies generally), it can break Rails associations as they assume a model can be looked up by ID (#6873). Perhaps we should move to a more generally available scopes on every model? .visible, .sorted etc?

Didn't mean to use this bug only for users.

#6 - 08/07/2014 12:59 PM - Dominic Cleal

- Blocks deleted (Bug #6964: Error on startup: "null value in column "user_id" violates not-null constraint")
